DETAILED ACTION

1. This communication is in response to applicant's reply to restriction requirement 1/17/2006. Applicant has elected group I, claims 1-14, with traverse.

Election/Restrictions

2. Claims 15-33 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 1/17/2006.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe Muncy on 5/1/2006.

In the claims:

- Cancel claims 13-14 and the withdrawn claims 15-33.

Allowable Subject Matter

4. Claims 1-12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1 and 8, the prior arts of record fail to teach or disclose an apparatus for data input, which comprises a sensing circuit for a plurality of keys, outputting an interruption signal and a corresponding group of data bits when one of the keys is pressed; a shift register circuit receiving a strobe signal, a clock signal and the group of data bits in parallel from the sensing circuit when the strobe signal is asserted, and serially outputting the group of data bits in synchronization with the clock signal; and a microcontroller receiving the interruption signal, outputting the strobe signal and clock signal when the interruption signal is asserted, and serially receiving the group of data bits from the shift register circuit to identify the key being pressed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6) The prior arts made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Hastreiter U.S. Patent 4,667,181 teaches a keyboard data input assembly, in which complementary arrays of first and second switch contacts are connected in equal sets and each set of first contacts is connected to a separate set of second contacts through a diode so that the connected sets of contacts do not contain contacts from the same switch, thus permitting keyboard terminals individually associated with the

Art Unit: 2635

connected sets of first and second contacts to be sequentially enabled while reading the unenabled terminals to determine actuated switches. However, Hastreiter does not teach using a shift register, strobe signal and an interruption signal as claimed in claim 1.
